

8 Benefits of MicroData's Hardware-as-a-Service (HaaS)

Hardware-as-a-Service, or **HaaS**, is a new idea for small and mid-sized business. With HaaS, the equipment and software that make up your infrastructure (servers, firewalls, routers, switches) is provided to you as a service. **You never buy anything. You simply pay monthly for what you use.**

Benefit #1: Immediate Cost Savings

With MicroData HaaS, initial costs are limited to only the first month's payment which is a small fraction of the traditional costs.

Benefit #2. Software Upgrades Are Included

Never worry about software licenses or upgrades - MicroData HaaS does it for you.

Benefit #3: No Long-Term Tie-ins

MicroData HaaS works on a simple month-to-month basis.

Benefit #4: You Get Better Security and Reliability

MicroData's HaaS offers state-of-the-art equipment and software that lets even the smallest company have the most reliable, secure, and powerful technology.

Benefit #5: MicroData's HaaS equipment is always under warranty

Benefit #6: Ready Integration with Private Cloud, Hybrid-Cloud, Cloud, and Premises

Benefit #7: Rapid Turnaround

Adjusting your IT infrastructure quickly allows you to capitalize on opportunities when they arise.

Benefit #8: Piece of Mind

Focus on your business and let MicroData's HaaS take care of your infrastructure.

As a prospective customer, we would like to **offer you a review of your IT infrastructure and environment**. We will perform a comprehensive review of your entire network to look for potential problems, security loopholes, spyware and other issues that may be creating problems. We'll also evaluate how HaaS can replace your current infrastructure and end-user environment.

Call us today at 800.924.8167 to schedule a review of your IT infrastructure and environment. Or contact us on the web at microdata.com, or by email to info@microdata.com
