

Managed Backup & Archiving

MicroData®

Business-Class, Fully Managed Backup-as-a-Service

Managing backups of multiple physical and virtual servers can be challenging, time consuming, and expensive. Let MicroData take care of ensuring that your organization's data is safely and securely backed up every day. We supply the hardware, software, and even take care of the installation. It's truly a turn-key solution.

MicroData Managed Backup includes:

- Assessment of current data set and custom-developed backup plan
- All required software for both physical and virtual servers including VMware and Hyper-V. Includes agents for SQL, Exchange, Linux, etc.
- Installation and configuration
- Corrections or adjustments that may be required on an ongoing basis
- Daily monitoring & alerting
- Daily & monthly reporting
- Granular restore
- Optional off-site archiving

The fact is 100% of tape and disk-based backup systems will fail at some point. Why take the risk? Let MicroData take the hard work out of safe and secure backups for your organization's data.
