Infrastructure as a Service (IaaS)

MicroData®

It's Time to Get Rid of Your Old Infrastructure

With MicroData's *Infrastructure-as-a-Service*, the hassles and expense of dealing with Information Technology are over.

- Hardware is provided and maintained by MicroData. Stop the endless cycle of upgrades and replacements forever.

- Always have the latest infrastructure software without having to purchase anything. <u>Upgrades are free</u>.

- <u>No long-term tie-ins</u>. MicroData IaaS is offered on a month-to-month basis. Cancel anytime.

- Available fully managed by MicroData or unmanaged.

- Perfect for quick business expansion, office consolidation (or complete office virtualization), or as a solution to instantly bring the latest technologies to your business.

Keep IT Simple

In 2017, it doesn't make sense to invest substantial capital resources in infrastructure assets that will just need to be replaced in a few years. Now a small monthly payment gets your organization a complete IT infrastructure - including the latest servers, Private Cloud assets, Firewalls, Routers, and network software.

MicroData has been amazing to work with. Their Private Cloud solution has enabled us to transform into a nimble, responsive company while at the same time substantially reducing operating costs and increasing uptime. I'm so glad I found Glenn and the Pro's at MicroData.

Rob Bossler
President/CEO
Biometrix Corporation

MicroData drastically improved network performance, speed, uptime, security, and my peace-of-mind; they also replaced our older POS terminals and worked with our application vendor to ensure complete success. The system engineers and the company has been outstanding from the get-go, honest, timely, responsive, and respectful.

Bob Morelli
General Manager
Meadow Brook Golf Club

And MicroData can handle all aspects of your transition to IaaS. So whether you are getting rid of an expensive office lease and moving to a virtual business model or are dealing with upgrades of old, out-of-date technology, MicroData can handle it all.

Make IT work for your business.
Focus on your customers and let MicroData take care of IT.

What Next?

Implementing an IaaS solution may be new for you, but we're here to help. MicroData can handle everything from planning, to migration, to roll-out.

Contact us today for a no-obligation consultation where we'll listen to your needs, answer your questions, and explain options.
